*Bred in captivity* or *captive-bred* refers to raptors, including eggs, hatched in captivity from parents that mated or otherwise transferred gametes in captivity.

*Captivity* means that a live raptor is held in a controlled environment that is intensively manipulated by man for the purpose of producing raptors of selected species, and that has boundaries designed to prevent raptors, eggs or gametes of the selected species from entering or leaving the controlled environment. General characteristics of captivity may include, but are not limited to, artificial housing, waste removal, health care, protection from predators, and artificially supplied food.

*Falconry* means the sport of taking quarry by means of a trained raptor.

*Raptor* means a live migratory bird of the Order *Falconiformes* or the Order *Strigiformes*, other than a bald eagle (*Haliaeetus leucocephalus*) or a golden eagle (*Aquila chrysaetos*).
